MATH 10A A01 Nguyen, Hieu Trung #656382

MATH

Instructor

Best Calculus instructor ever!

Personally I hate math. I'm a Psychology major and so this is one of the two math courses I'm required to take so unwillingly I took it. The professor had a very good command of the material and also made extra office hours to help students with preparation for the exams. Although, in the beginning it was a little difficult to understand his accent it was not a problem after the first few classes. Overall, I think I've learned the most in this class than any other math class. Probably because it was so difficult that I tried that much harder and because the professor really cared enough to help.

Professor Nguyen is AWESOME

Prof. Nguyen- explained the material well and was helpful.

Professor Nguyen was a wonderful professor. He explained material slowly and carefully and always stopped to make sure everyone understood him.

Course

Difficult pace to keep up with during the 5 week summer session

Exams

Reflective of the material covered in class

The quizzes and exams were fair.

The quizzes and exams were a good reflection of the lecture material and homework.

Reading

Calculus.
